

Princeton Airport

Dick Nierenberg, Princeton Aero Corp. (Nierenberg family owned)

General

Princeton Airport is a privately owned, public use facility serving the central New Jersey region. The airport is located off of Route 206 in Montgomery Township. Over the years the airport footprint has varied, however it currently occupies 104 acres. It supports a number of general aviation uses including corporate helicopters, Medivac aircraft, and transient aircraft bringing visitors to Princeton University. There are about 150 aircraft based at the airport which has 250 operations daily. The single asphalt paved runway, runway 10/28, is 3,500 feet long x 75 feet wide with a full length taxiway and runway lighting system. Both aviation fuel and Jet A fuel is available. The maintenance shop provides major engine and airframe services. There are paved tie-down spaces and 90 T-hangars.

The airport grounds and infrastructure are well maintained. The airport is home to Raritan Valley Flying School, Nassau Helicopter (school), Analar (helicopter charter), Princeton Pilot Shop and PAC which provides aircraft maintenance and avionics services.

Additionally there are four offices available for rental.

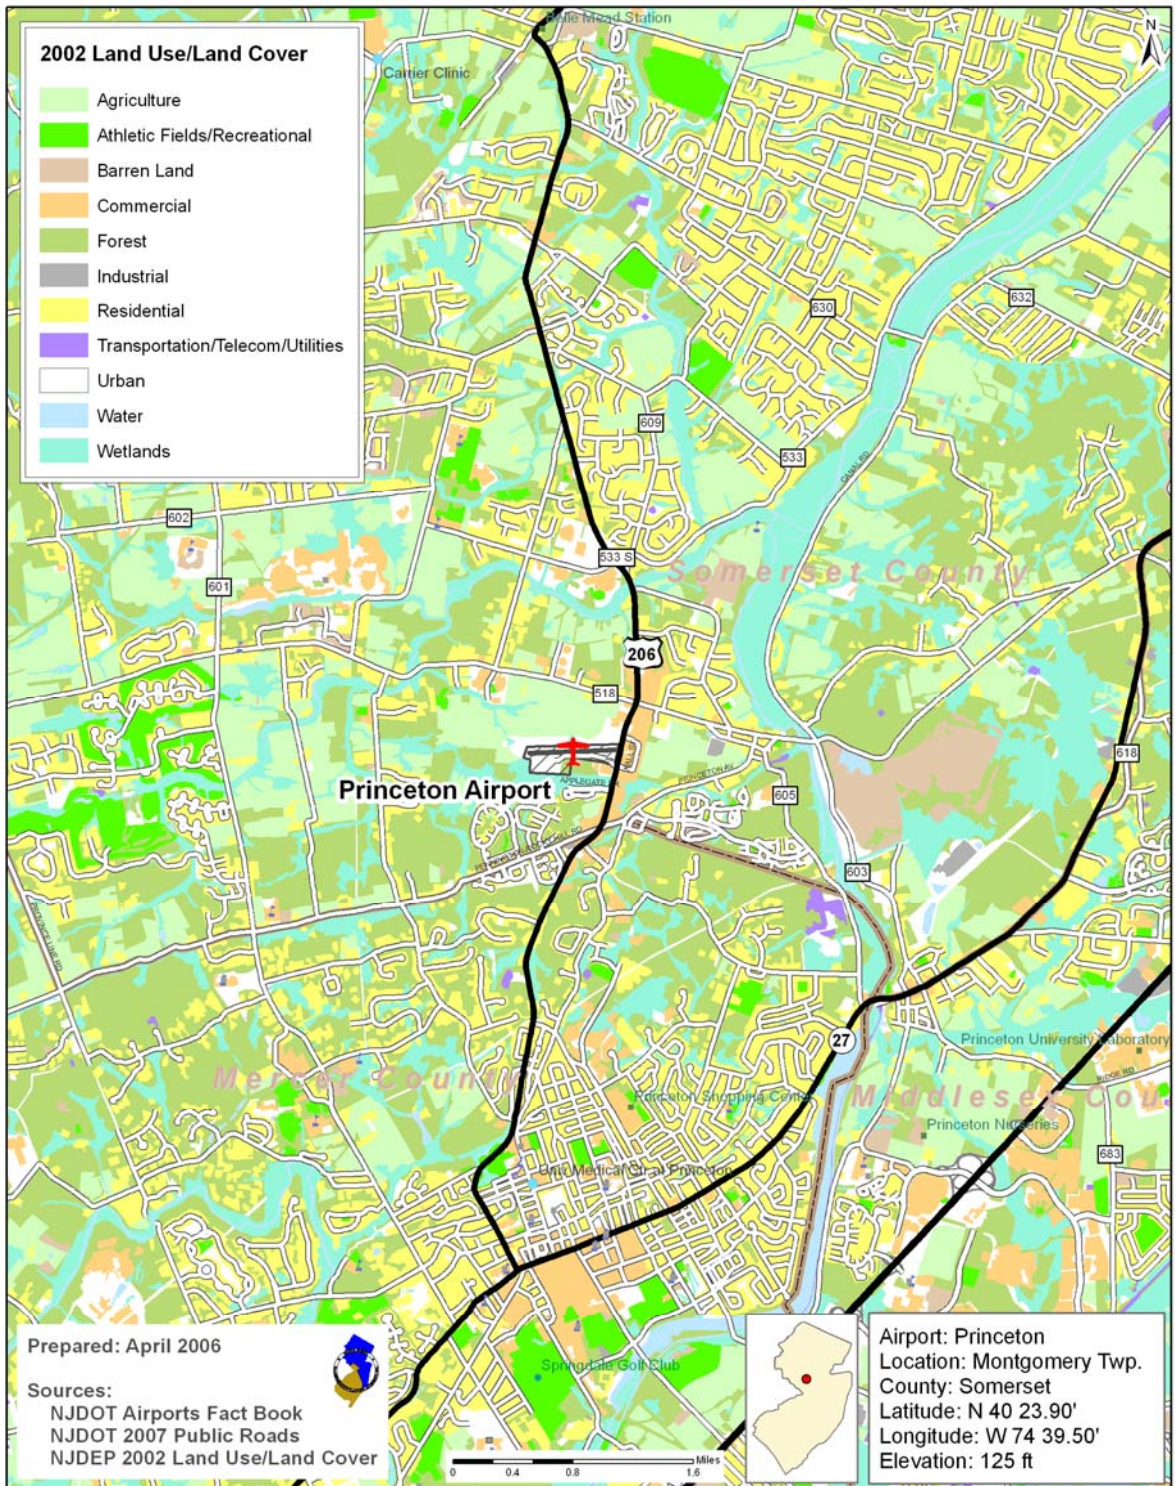

Access and wayfinding:

The airport is approximately 15 miles south of Somerville Circle and about three miles from Princeton. Princeton Airport management would like to see directional signage at the following locations: on I-95 at Exit 206N, both north and southbound; Route 27 South at Rt. 518; Route 1 North at the Harrison Street exit; Route 206 at Ewing Street; Route 1 South at New Road; Route 27 South at New Road; Route 18 at Route 1 South; Route 206 at Route 533; Route 31 South at Route 518; Route 31 North at Route 518; and the Somerville Circle.
